PROJECT:

Developed an '**Online Job Portal**'.

A web application which connects job seekers and employers to find suitable jobs and post various job proposals respectively.

Developed it with 3 other team members using **Java** as our main programming language. Front end developed using html5 and Css for styling the web pages.

The project was deployed on Tomcat Apache server, and we used Oracle for the backend database. Database connectivity was established through **JDBC**.

ACHIEVEMENTS:

Secured 2nd position for 2 consecutive years in school level **Singing Competition**.

Secured 1st position for school level **Dance competition**.

Certified for attending 3 days **LINUX** workshop organized by Netcamp.in.
